COOP Availability: 28 June – 28 August 2026 · Jeddah / Remote / Riyadh

PROFESSIONAL SUMMARY

Information Technology student at King Abdulaziz University (GPA 4.44 / 5.0) who designs, builds, and ships complete web products — handling everything from authentication and file processing to deployment and user experience. Built and launched a live Arabic SaaS solo using React, Next.js, and TypeScript. Seeking a Summer 2026 COOP placement on a product, frontend, or SaaS team.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, RTL Support

Tools & Workflow: Git, GitHub, Vercel, Figma, VS Code, REST APIs, AI API Integration

PROJECTS

Kitab AI — Arabic Book Translation SaaS

Solo Project · [kitab-ai-xi.vercel.app](#)

- Designed, built, and deployed a live SaaS that translates English EPUBs into literary-quality Arabic — solely owned UI, authentication, file handling, credits system, and Vercel deployment.
- Engineered a three-stage AI pipeline: one model translates, a second flags untranslated text, a third refines fluency — achieving zero validation errors and 8.5–9.0/10 fluency across 2 benchmark books (manual review).

Sate B — Digital Menu

Client Project · May 2026 · [GitHub](#)

- Built and delivered a mobile-first QR restaurant menu for a real Makkah client; permanently adopted by the owner after launch.
- Scored 5/5 on design, image quality, and customer experience in the owner feedback survey.

SkillMap — Career Roadmap Platform

Team Project (3 members) · [GitHub](#)

- Co-built the frontend of a full-stack career-roadmap platform featuring role-based templates, checklist tracking, and progress systems across 6 career paths.
- Recognized by the course instructor as one of the top 2 projects out of 9 teams.

OdusPlus UI Redesign — Academic Prototype

[Live Demo](#) · [GitHub](#)

- Redesigned 3 core pages of KAU's student registration system (homepage, academic records, calendar) — improving RTL layout, navigation clarity, and overall usability.
